

## Assignment 3

- In this assignment I have got some problem with the GUI. Then I have researched about javax.swing and find out how to use the Swing Library to build GUI apps
- I have gone through some errors of IOException. I have resolved it from internet
- Two action button were added for browse and calculate
- In error handling I was having error of wrong data. If the data was not in some structure it was generating the payroll.txt file with no data. I have resolved this issue by IOException.
